PS-9060

60 watt fan cooled power supply for the OT-CC-6-1U chassis. Hot swappable 100-240 VAC 50/60Hz operation. Choice of North American (-NA) European (-EU) or United Kingdom (-UK) power cord.

PS-9012

18W wall mount power supply for the OT-DTCR-1 & -2 desktop enclosures. 100-240 VAC 50/60Hz operation. Includes regional power socket adapters.

Enclosures for Optiva Insert Cards

The new Optiva OT-CC-16F, with internal cooling fan, and standard OT-CC-16 enclosures are ruggedized 3RU aluminum rackmount chassis that accept any Optiva insert card. These high capacity 16-card plug-in chassis provide a "state of the art" platform for density and space utilization.

Both 3RU models feature hot-swappable, fan cooled power supplies and insert cards. Options include redundant power supplies, LED indicators for power and status, as well as reversable rack mounting ears. With the addition of the SNMP Management card (Model: OPV-CTLR-IC), all chassis and insert card health parameters may be monitored remotely.

The OT-CC-6-1U series chassis is a low profile 1RU rackmount enclosure. It holds up to 6 Optiva insert cards with space for an optional SNMP Management card (Model: OPV-CTLR-IC). It features redundant, hot-swappable, fan cooled power supplies and rack reversable mountable ears. LED indicators are provided for power, fault, optical lock and network management status.

Our smallest and most compact enclosures, the OT-DTCR-2 and OT-DTCR-1 are perfect for installations that are space constrained or simply do not require rackable equipment. Popular uses are for remote video camera feeds, airport terminal signage, or simple point-to-point fiber links. These enclosures are passively cooled and are powered by the external PS-9012 power supply.
